Measurements

Terracotta Tile cardstock: One standard C6 top folding portrait orientation C6 card, one full card front size piece, (10.5cm x 14.85cm), another piece 5.5cm x 9cm and scrap for die cut.

Vellum: One card front size piece

DSP (floral): Two pieces. One is 5.2cm x 8.7cm, the other 5.5cm x 10cm

DSP Terracotta Tile patterned: 2 pieces 14.4 x 10cm

Gray Granite: 1 piece 8.3cm x 9.3cm plus scrap for die cut

Shimmery White: 1 piece 8cm x 9cm plus scrap for 2 greeting labels

Step by Step Instructions

1. In addition to the normal fold, score the front of the card halfway horizontally, fold inwards and burnish with bone folder.

2. Cut and prepare your additional cardstock and DSP (it's not all shown in this picture so use the measurements section). For the DSP, use a subtle monochromatic piece for the big layers, and a highlight piece for the centre panel and under the die cut inside.

3. Do the die cutting (again not all shown in this picture):
   - Vellum layer using the Ornate Frame that measure approximately 8cm x 12cm.
   - The decorative piece from under the greeting using the Detailed Bands dies.
   - The Gray Granite inside border piece using the Ornate Borders dies (shown in the main pictures).

4. Stamp the two greetings in Gray Granite ink onto Shimmery White cardstock. Cut these out using the oval piece in the Detailed Bands dies (I always find it best to stamp and then die cut as this usually gives more accurate placement of the greeting).

5. Adhere the monochromatic DSP to the card front sized piece of Terracotta Tile (not the actual base card as we use that later) using Snail or glue. Adhere the vellum die cut (use the same adhesive in centre as the next layer will cover it) and then the DSP piece (the one 5.2 cm wide) with Terracotta Tile mat.

6. Create a loop with the ribbon and tape in place.

7. Add a gold gilded gem to the top of the 'thanks' oval greeting piece and adhere with Dimensionals over the top of the taped area of the ribbon. (Don't adhere to main card yet).

8. On the inside of the card, adhere the monochromatic DSP piece to the base card and then the floral DSP piece (the one 5.5cm x 10cm) to the bottom of this using Snail or glue.

9. Add the Gray Granite border piece at the top of this floral DSP (shown in photo at bottom of page).

10. Adhere the Terracotta Tile decorative piece over this (using glue or Snail).

11. Add a small gold Gilded Gem to the side pieces of the Terracotta Tile decorative piece.

12. Adhere the oval greeting over the top using Dimensionals.

10. Adhere the rectangle piece of Shimmery White cardstock to the Gray Granite mat and adhere above the floral DSP piece using Snail or glue. This is where the greeting gets written.

11. Add Tear and Tape strong adhesive strips to the bottom half of the card front. Adhere the bottom half of decorative card front to this (the top half doesn't get adhered down).

12. The base of the easel card rests on the Gray Granite border (as seen in main photos).
